The 2010 update to California Statewide Local Streets and Roads Needs Assessment was released in February 2011. The report provides a systematic approach to quantify local street and road needs. The weighted average Pavement Management Index for Monterey County fell from "at risk" in the 2008 report to "poor" in the 2010 report. The report is an important tool to educate policy makers and the public regarding the funding needs for the local transportation system. Methodology and data from this report will be used as the basis for incorporating local operations and maintenance costs in the 2012 Regional Transportation Plan.
