In the event a simple majority vote on a question has previously been taken, and a weighted vote is subsequently called; a roll call vote will be taken that tabulates both the weighted vote and the members voting. The vote weighted by a majority of those voting representing a majority of the population shall supersede the previous simple majority vote. For the purposes of determining the weighted vote of Cities or the unincorporated area of the County, the weighted vote by population shall be based on the most current Census, updated annually by the California State Department of Finance population estimate when it becomes available. Source of Population Data on this table is the State of California Department of Housing Table 2:E-5 City/County Population and Housing Estimates dated January 1, 2008.
