

# US 101 San Juan Interchange Project

## PROJECT DESCRIPTION

The San Juan Road area is a choke point for interregional travel along Highway 101 for goods movement, commuters and visitors. Highway 101 in this area has a high crash history and very high traffic volumes of over 63,000 a day. The project proposes to remove three at-grade intersections (Dunbarton Road, San Juan Road and Cole Road) and construct one interchange near the Red Barn. The new interchange will help improve safety and reduce the congestion along this heavily traveled stretch of Highway 101.

US 101 - San Juan Road intersection

## PROJECT BENEFITS

- ▶ Reduces delay and improves safety for over **12,600** trucks a day
- ▶ Addresses safety concerns in a high accident corridor
- ▶ Eliminates left turn conflicts
- ▶ Reduces delays on Highway 101
- ▶ Provides safer access for local businesses and residents

## COST ESTIMATE

Secured State Funds: \$ 62,275,000  
 Secured Stimulus Funds: \$ 10,450,000  
Non-State Match: \$ 17,875,000  
 Total Project Cost: \$ 90,600,000

Estimated schedule - subject to revision
