Clarifications – Bidder Questions and Responses

1. **Question**: Does TAMC have a geotechnical report or any additional utility information they can provide as part of the RFP?
   Response: The geotechnical report and additional utility information can be found at this link.

2. **Question**: Will environmental compliance services during construction be provided directly by TAMC, or should these services be included in the Consultant's scope of work?
   Response: The CM will provide the environmental compliance services and should be included in the scope of work.

3. **Question**: The RFP indicates an anticipated contract duration of approximately 2½ years (April 2026 through December 2028). Is this timeline driven primarily by utility coordination activities, or are there other factors influencing the projected duration?
   Response: Any utility coordination/relocation is included in that 2.5-year duration. The overall schedule is our estimate of the total construction duration.
